Welcome

Home to the Native honey Bee!

Bees & Co. started at the world's first certified Carbon Neutral honey farm and is home to the native British honeybee.

We're award-winning, ethical bee farmers caring for bees on behalf of some of the most recognisable and iconic brands in Britain.

Our beehive adoption plans are helping to prevent the decline of the native British honeybee, whilst providing an innovative and natural sustainability solution for responsible businesses looking for creative CSR or carbon offsetting solutions.

Read on to discover what we do, how it works and the myriad benefits of adopting bees for your business.

“ Inspired by my love for these amazing creatures, we are delighted to be involved with Bees for Business and to have adopted a hive - we're already planning a toast and honey tasting session with our first jar! ”

Sophie Allport, founder, Sophie Allport

What We Do

"A. MELLIFERA [THE HONEYBEE] APPEARS TO BE THE MOST IMPORTANT, SINGLE SPECIES OF POLLINATOR ACROSS THE NATURAL SYSTEMS STUDIED." THE ROYAL SOCIETY, 2018

Sustainability for Responsible Businesses

We install your adopted hive at one of our exclusive apiary sites, caring for the bees throughout the year.

We'll send hi-res imagery and video of your newly adopted hive and occasional additional updates ideal for social sharing - your hive can contain as many as 80,000 bees at the peak of summer!

Honey As Unique As Your Brand

Each September, true to our artisan approach, we harvest the honey by hand. A flavour signature of the landscape the bees forage on, your honey will be as unique as your brand. As part of our community engagement program, we send 12 jars of honey from your hive to a national food bank helping those on low incomes to have access to healthier eating.

ACCORDING TO VARIOUS RECENT STUDIES GLOBAL INSECT DECLINE IS IN ABUNDANCE OF 50-75%" SOIL ASSOCIATION, 2019

You'll have the option to purchase jars of honey for your own use at our exclusive wholesale prices, and add customised labels to your jars. Ideal for client gifts, email us to request a copy of our Corporate Gifting Catalogue.

Honey lovers:

Sophie Aspinall

Reducing Carbon, Maximising — Environmental Impact —

Become climate positive for just £4.80 per week

Adopting a hive with Bees & Co. provides an engaging solution for carbon offsetting, supporting local environment and business:

- association with the world's first certified Carbon Neutral honey farm
- our organic farm uses 100% renewable energy with a 'closed loop' recycling system
- our native honeybees have zero carbon footprint unlike other imported, non-native species
- our hives are handmade from British sustainable cedar wood, sourced from renewable suppliers

Ready to adopt? Call Salma: 01778 487924, or email: hello@beesand.co

“We are helping to maintain the bee population, but we also receive honey from our very own hive, which we can either use as gifts for suppliers, or as a reward for staff. We’re really excited about this initiative and we hope that other companies will join in to ensure that the honeybee population is protected for years to come.”

Becky Naylor, co-founder and Director of Client Services, Bronco

Culture + CSR

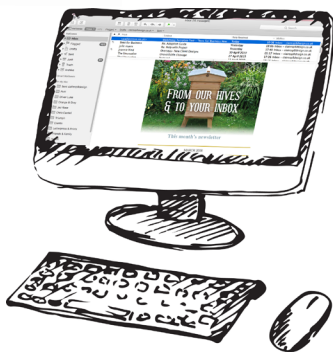

Stakeholders and Press

Adopting a beehive of native British bees is topical, unusual and newsworthy. Our free Press Kit supports you in letting key stakeholders and both national and trade press know about your exciting adoption.

Digital Engagement

We upload your licence-free updates to an exclusive, secure Dropbox folder. Use the visual resources to engage teams and keep customers, employees and stakeholders up to date with your brand's adopted bees.
